- exhibitions
- etc.

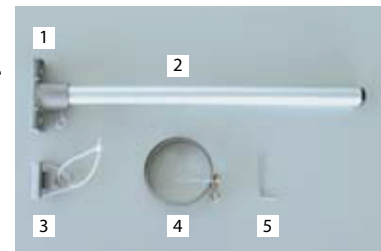

Banner arm on top and bottom

Street Banners offer a great way of promoting in urban centres and inner cities. They can be mounted to almost any outdoor power pole or lamppost, or to columns and piles indoors. The mounting to building walls is also possible. Once it has been installed the brackets of the system can remain on the pole or wall. The changing of the banner is easy.

System

- 1 durable, stainless mounting bracket (aluminium casting) with eyelet screws
- 2 Banner arm Ø 25 mm x 2,5 mm (profile made of aluminium) with end caps
- 3 Eyelet bracket (aluminium casting), cable tie
- 4 stainless steel strap for fixation on every pole with a Ø of 60 - 250 mm
- 5 Allen key

Available materials

Multiflag[®],
the classic flag material with a high tear strength

Varioflag[®] A SE,
slightly glossy knitted polyester with excellent air permeability due to the punched structure

Advantages

- high-quality print with perfect print through using water based disperse dye inks
- brilliant colour reproduction
